

MOHAMMED ABDULMAJID MOHAMMED HAGWAN

Software Engineer| Project Manager| AI Developer

+967781657888 • hagwanmohammed@gmail.com • <https://www.linkedin.com/in/hagwan/> • Sana'a, Yemen (Able to relocate)

Summary

Lead Software Engineer with solid experience building full-cycle solutions across web, mobile, ERP, and AI-driven systems. Skilled in Flutter/Dart, JavaScript/Next.js, Firebase/Supabase, SQL, and integrating LLMs, AI chatbots, and agentic automations to streamline business operations. I've led and delivered projects for agencies and tech teams (SAMA Trending, Xentral Methods), including AR-based educational apps and custom ERP enhancements, ensuring the tech stays aligned with business goals. Comfortable working in Scrum sprints, integrating authentication, and deploying to modern stacks (Vercel, DigitalOcean, Hostinger). Looking to bring a build-fast, automation-first mindset to teams that want scalable, user-focused products.

Experience

SAMA Trending — <https://samatrending.com/> Wyoming, United States
Software Engineering Project Manager 06/2024 - Present

- Lead and actively contribute to the full-cycle development of websites, systems, mobile applications, AI, automation systems, and ERP solutions, driving innovation while ensuring alignment with business objectives.

Itqan Syystematic Sana'a, Yemen

- Implemented a custom ERP modules, Increasing employee productivity and enhancing data accuracy across departments.
- Optimizing existing ERP system configurations and eliminating redundant processes.

Xentral Methods — <https://www.xentralmethods.com/> Cyberjaya, Malaysia
Full Stack Developer 05/2023 - 09/2023

- Designed and implemented a Flutter-based application for iOS and Android platforms, emphasizing augmented reality (AR) technology tailored for educational purposes.

Education

Multimedia University Cyberjaya, Malaysia
BSC (Hons.) in computer science (Software Engineer) 2019 - 2023

- Important Modules: Data Structures, Software Engineering, Database Systems, Computer Networks, Web Technologies, Mobile Application Development

Skills

Technical Skills: — • **Mobile & Frontend:** Dart/Flutter, JavaScript, HTML/CSS, Bootstrap, Tailwind, Next.js, WordPress
• **Backend & Data:** Firebase, Supabase, SQL, REST APIs, Authentication
• **AI & Automation:** LLM, Machine Learning, AI chatbots, Agentic automations, n8n
• **Dev & Delivery:** Git, Docker, CI/CD (GitHub Actions), Hosting/Deploy (Vercel, DigitalOcean, Hostinger)
• **Design:** Figma
• **Methods & Collaboration:** Scrum sprints
• **Productivity:** Microsoft Office (Word, Excel, PowerPoint)

Soft Skills: — • **Leadership:** lead more than 10+ projects in a team full of designers and developers.
• **Proactive:** able to make design decisions and act on them
• **Communication:** a good communicator and comfortable working in a team
• **Time Management:** Successfully balanced academic studies and extracurricular activities.
• **Critical Thinking:** Applied critical thinking skills to problem-solve and keep projects on track.
• **Problem-Solving:** Addressed challenges in projects such as the Investment Trading Group.

Projects

Ta'Allam - Saudi Data and Artificial Intelligence Authority (SDAIA) Riyadh, Saudi Arabia
11/2024

- Developed as part of the Allam Challenge, *Ta'allam* is an Arabic language learning app designed for children, focused on leveraging the Allam AI model to enhance Arabic language education through AI-driven interactivity.

Projects

Investment Trading Group (ITG)

<https://investmenttradinggroup.eu/>

- It is a private investment firm located in Spain that focuses exclusively on managing its internal capital using advanced analytics and artificial intelligence (AI) to make trading decisions.

YAMEX Group

<https://yamexgroup.com/>

- YAMEX Group is a trade and export website showcasing the company's services, key sectors, and contact channels for global business partnerships.

SpaceTech

<https://www.spacetech.dev/>

- Spacetech builds interoperable, AI-native business systems for software, e-commerce, ERP, and upcoming real-time AI tools, all engineered in-house to work together with clarity, reliability, and scale.

Agentic Automations

- Building AI-driven workflows that can trigger actions, fetch data, and make decisions across tools (n8n, APIs, ERP) with minimal human input.

Volunteering

Arabian Culture Society

Malaysia

High Committee Club Member

Eid Happiness (2019, 2022, 2023)

Eid Happiness is a volunteer event held every Eid al-Adha where students from different universities across Malaysia come together to share joy with children from struggling families or orphans. I participated in and helped manage three editions of the event:

- [Eid Happiness 5 \(2023\)](#)
- [Eid Happiness 4 \(2022\)](#)
- [Eid Happiness 3 \(2019\)](#)

Roles included coordination, on-ground support, and helping create a festive experience for the kids.

A'ata Initiative (2021, 2022, 2023)

A'ata Initiative is a Ramadan charity campaign aimed at delivering food boxes to struggling families across different cities in Malaysia. I joined and helped manage three consecutive editions, supporting coordination, packing, and distribution efforts to make sure aid reached the right families on time.

- [A'ata Initiative 6 \(2023\)](#)
- [A'ata Initiative 5 \(2022\)](#)
- [A'ata Initiative 4 \(2021\)](#)

Focus: community service, logistics, and student-led social impact during Ramadan.
